ABOUT THE INSTITUTIONS

Panchakshari Shivacharya Trust is a charitable trust registered under Bombay Public Trust Act 1950. It undertakes Educational and Social activities since 1973. Trust actively engaged in Promoting Quality Education in Technical Field. Trust has started Govt. aided Channabasweshwar Polytechnic, D. Pharmacy Institute in the year 1980, which is one of the reputed Diploma Pharmacy Institution in the State of Maharashtra. After realizing the prospectus and potential of the course in the emerging scenario of the global pharmaceutical Industry and Education. The Trust has started Degree (**B. Pharm**), Post Graduate (**M. Pharm**) **Pharm. D.** and **research centre** as well. The Courses are approved by Pharmacy Council of India, New Delhi and AICTE. Institute has highly qualified, committed and motivated faculty, well equipped laboratories with spacious infrastructure.

Institute running many centrally funded schemes like CDT, MODROB, RPS, EDC and PMKVY. Institute is having experience of organizing various refresher courses, Workshops, Short term courses for teachers, supporting staff and students. At the outset of above all the Initiatives institution is succeeded in getting **ISO: 9001** Certification and always receiving **"Excellent"** Grade in External Institution monitoring of MSBTE Mumbai.

VISION

"The institute will be national level institute with a repute, it will provide a quality pharma education with excellence in educational process. It will cater the emerging and multifaceted challenges of pharma education; also it will take care of societal health on global scenario. We believe service to the mankind is serving for god."

MISSION

To become a role model and reputed pharma educational institute imparting excellence, demand driven pharma-education, with continuous strive for excellent services to global society under conducive, competitive and society beneficial environment."

ABOUT THE CONTEST

Drugs have the capacity to enhance health; they all have the potential to harm if prescribed inappropriately. For this reason, it is recommended that healthcare professionals who prescribe medications should exercise counselling, as general people have least idea and interest about healthcare settings, use of medicine and their untoward effects. Pharmacists have crucial role plays in both handling prescription and prescribing. A rational prescribing is the sole of patient safety, compliance and patient relief.

A Pharmacist is an important component of the ecosystem that is responsible for maintaining the health of the society. A large number of pharmacists are found working in Community Pharmacy sector as drug professionals who have direct contact with the public. Presently, the pharmacists are becoming more patient oriented than product oriented. Patient Counselling is the guidance provided to the patient by the pharmacist about the correct use of medicines. It is instructing the patient about various aspects of medicines like; how to take ,how long to take, what to avoid, precautions, common side effects, storage & any other relevant information about the illness. It has been shown patient counselling improve therapeutic outcomes.

Nowadays Patient counselling and patient-pharmacist interaction are clearly important aspects of the pharmacist's profession. Patient counselling's most important job is to improve patients' quality of life and deliver great care. Assessing the patient's understanding of the therapy,

including correct use and adverse effects of the medicine; enhancing patient compliance; and motivating the patient to take an active role in health management are all goals of patient counselling.

As per the revised syllabus of the Diploma in Pharmacy as E.R. -2020 the subjects introduced in the curriculum are as per the future needs of the society, expectations of the health care team and other stakeholders from pharmacists. It is expected from pharmacists to engage in doing the basic work like Advise on medicine, providing information on the products, counselling the patient etc. A unique State level Patient Counselling contest was organized in the last year in order to improve the skill and knowledge of budding pharmacist and to discharge their duties in effective way. People from community pharmacy sector. Maharashtra State Pharmacy Council, Food & Drug Administrative Dept., academicians, medical and Para-medical field appreciated the efforts of organizing team for successfully organizing such a unique and first of its kind contest on patient counseling. After overwhelming response to first contest throughout the state it will be pleasure for us to organize this year's contest once again in collaboration with MSBTE and APTIMS.

OBJECTIVES

The State level Patient counselling contest being organised with the following objectives:

- To fulfil the requirement of curriculum as Patient counselling is introduced as part of curriculum of subjects like Pharmaco-therapeutics & Community Pharmacy.
- Prepare future pharmacists doing the basic work like advice on medicine, providing information on the products, counselling the patient etc.
- To equip the budding pharmacist as effective counsellor in reducing medication errors, minimizing incidents of adverse events and drug interactions and improving patient compliance.
- Creating awareness among the students with concepts of Patient counselling, and making familiar with the techniques and skills of counselling.
- Develop active communication and listening skill among the students which are the important requirement of effective counselling.

RULES AND REGULATIONS

- Registration is compulsory for participation, and fees is Rs 300/-.
- Maximum two entry per institute along with Mentor is allowed.
- Valid college ID Cards is compulsory for participating team.
- The patient counselling contest is open for D. Pharmacy students only.
- The contest is going to be organised on role play concept.
- Participating team will consist of two students (One Pharmacist and another will be patient or as per need they may take additional member as patient relative). Time allotted for each participating team will be 10 min.
- Participating teams should report 30 min prior to scheduled time at venue.
- Instruments, material, Pictogram, leaflets etc. required for taking part in the contest is to be brought by participating team at their own.
- Decision given by judges in all the matters will be final and binding to all the participants.
- Certificate of participation will be give to all Participants.

- Every institute shall scrutinize and identify the best team to participate in the contest.
- Teams will be selected from Preliminary round for final rounds and panel of Experts will identify winner and runner up in the competition.
- No TA/DA will be provided. only Lunch provided to Registered Participant.
- Organizers reserved all rights regarding all matters of contest.

WHAT WILL BE EVALUATED IN THE CONTEST

Judges will evaluate and score each team on the interaction and information presented during their patient counselling session. Participants will be expected to demonstrate efficiency in the following three categories:-

Professional Knowledge - Provide drug education to the patient in a manner that the patient can understand and use to benefit their therapy. Convey accurate information concerning the patient's medication therapy including but not limited to: medication, indication, dosage, form, route, duration, pertinent side effects, precautions, interactions, missed dose procedures, storage recommendations, and specific techniques for self-monitoring

Communication & listening Skills - Use an interactive approach to assessing and verifying patient understanding through the use of open-ended questions. Display effective verbal & non-verbal communication. Use language the patient will be able to understand. Demonstrate effective counseling techniques.

Patient Interaction - Communicate to the patient why the counseling session and information is important. Systematically think through problems and present medication information in a logical order. Provide information on non-prescription drugs. Display confidence and the ability to control and direct the counselling session. Manage time during the session effectively. Work efficiently with the team member.

Concluding session/remarks - Verify patients' knowledge and understanding of medication use. Take feedback to assess the patients understanding about the disease and medication. Give a chance to the patient to ask any doubts . Discuss the follow up parameters. Summarize the session by asking open ended questions regarding counseling with patients. Emphasis the main points of counseling at end.
